CAPTIVATING

TECHNOLOGY

The new Monster ratchets combine the experience and innovation that comes from 30 years of toolmaking, guaranteeing captivating technology that makes your everyday work that little bit easier.

SAFE SWITCHING

The flat switch lever sits flush against the housing on all models, preventing accidental switching and saving time and stress.

MECHANISM ENCLOSED IN RATCHET HEAD

Precise toolmaking with ultra-small tolerances combined with a special seal guarantees protection against infiltration by dirt.

INNOVATIVE **RATCHET MECHANISM**

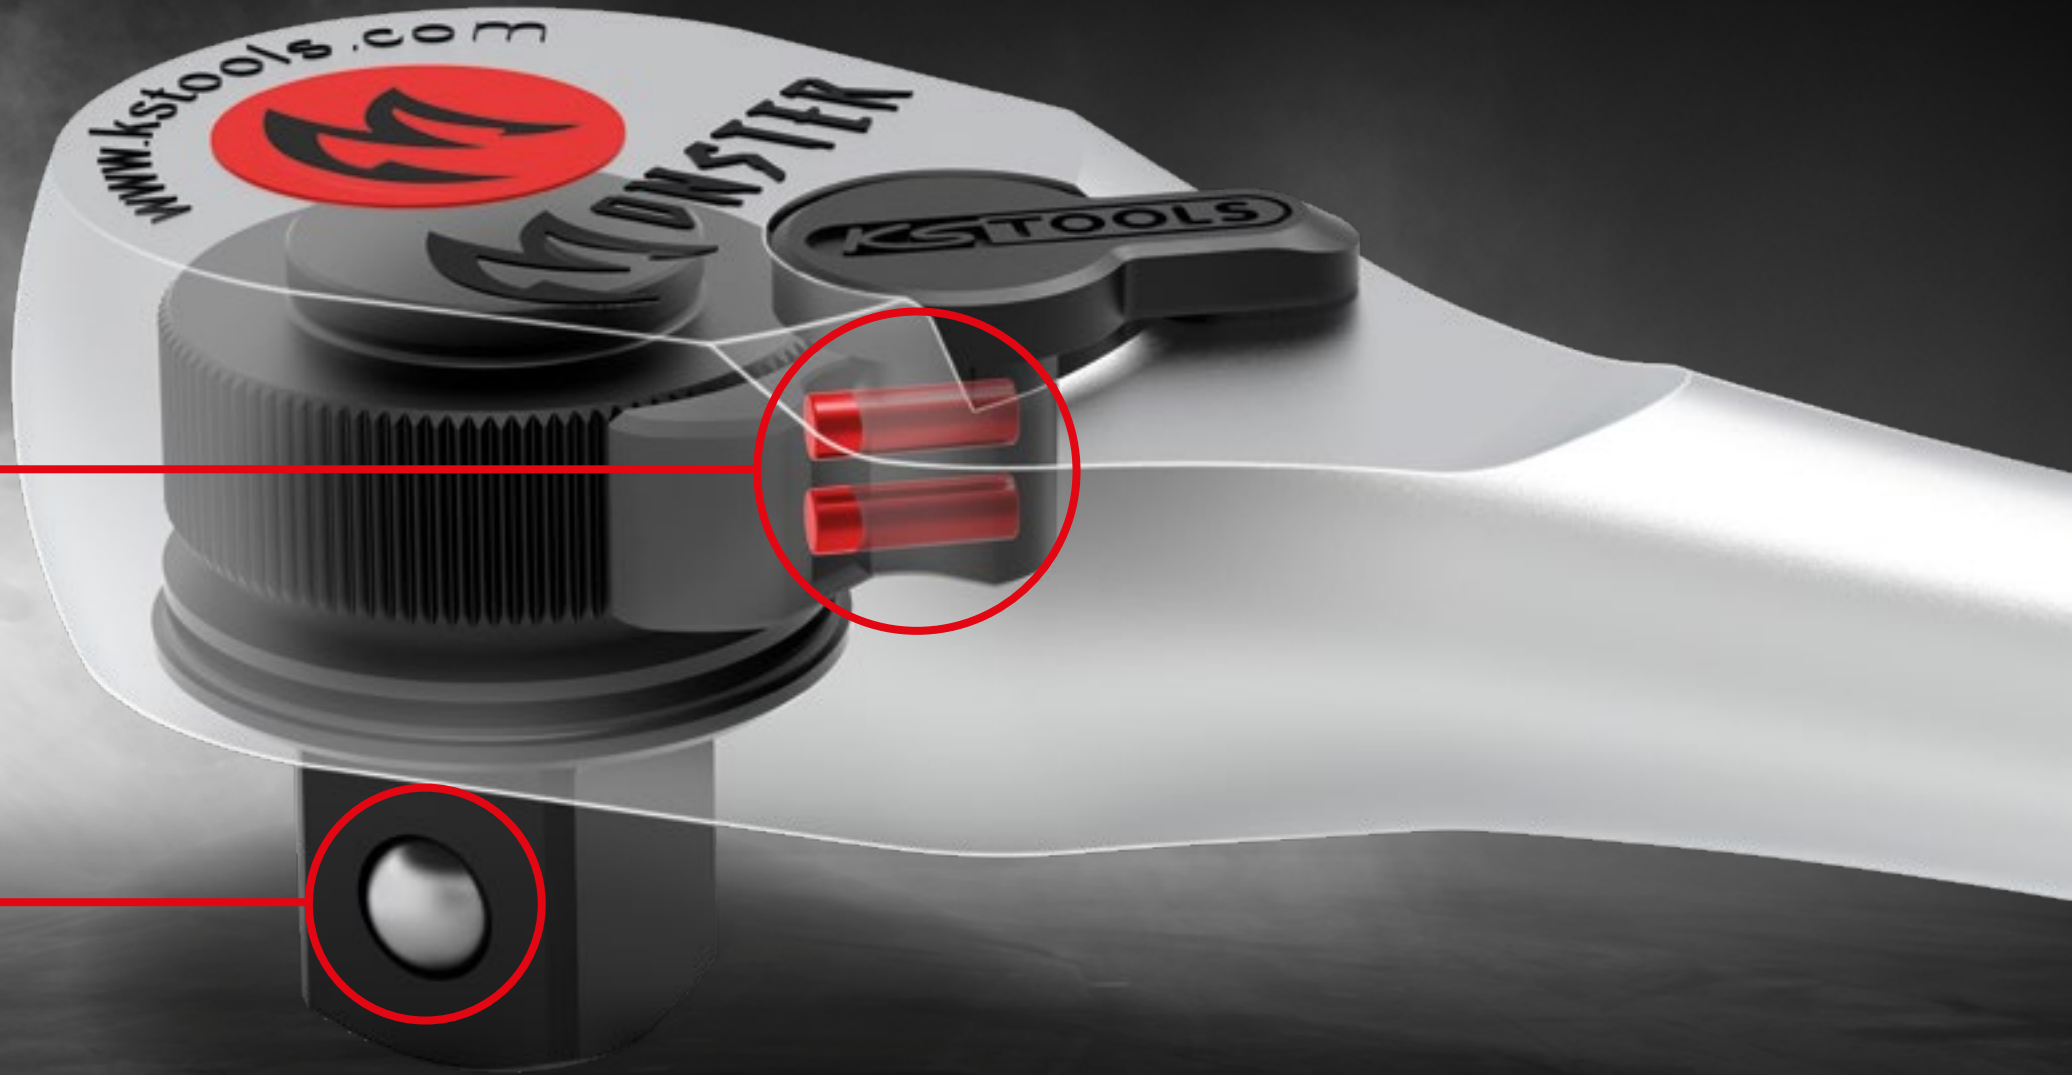

Our innovative twin-pin technology prevents the ratchet mechanism from slipping, while special lubricants give the mechanism a long service life.

BALL LOCK **ON THE SQUARE**

Ultra-reliable: the socket spanner inserts are held securely on the square with hardly any backlash.

KS TOOLS

UNBEATABLE HANDLING

100 % EFFICIENT
